## **Duxbury Transfer Station Compactor Repair Underway**

Residents are advised that the rubbish compactor at the Duxbury Transfer Station is scheduled for replacement April 16 through April 23.

Household rubbish will be taken and hours of operation will not change, however roll-off containers and rubbish compactor trucks will be used instead of the compactor station.

Expect delays on Saturday, April 19 and Sunday, April 20. Try to avoid any cleanup projects that week since services will be strained. Sunday, in particular, should be avoided if at all possible because of a small collection area, and no place to dump containers. If we run out of capacity we will be forced to close early.

Please bring all your recyclables since this service is not impacted.

Your continued cooperation is appreciated.

Walter Tonaszuck  
Director

## **Patience and Less Trash Requested This Weekend**

The replacement of the Compactor Unit for refuse will be concluded in a 10-day interval.

Residents should not expect the situation to be normal. There will be inconvenience, and delays especially on this weekend. Residents should try to minimize what they bring to the transfer station and be patient. We will be open.
